Documentation – Simple Cookbook Recipe Program

1. Project Overview

The Simple Cookbook Recipe Program is a small web project using HTML, CSS, and JavaScript.

It allows users to:

- View some preloaded recipes (Idli, Dosa, Chapati).
- Add new recipes with ingredients and steps.
- Search recipes by name.

2. Technologies Used

- HTML → Structure of the webpage.
- CSS → Styling for layout and recipe cards.
- JavaScript → Adding, displaying, deleting

3. Features

1. Preloaded recipes (Idli, Dosa, Chapati).
2. Add new recipes with a form.
3.Delete the unwanted recipes.
4. User-friendly interface with recipe cards.

4. Working

1. Page loads with preloaded recipes.
2. User can delete the recipes
3. User can add a recipe by entering details in the form.
4. New recipes are displayed instantly.

5. Advantages

- Simple and easy to use.
- Beginner-friendly for learning web development.
- Can be extended with more features like delete, edit, or images.
